

INSTALLATION INSTRUCTIONS

EPCO's antimicrobial properties will never fade and are removable.
It can be applied to any surface in the elevator car, including:

- **STAINLESS STEEL**
- **PLASTIC**
- **GLASS**

EPCO Antimicrobial Edgewater Protective Coating has been tested and will stay applied to a surface that is **CLEAN** and **OIL FREE**.

INSTRUCTIONS:

EPCO LIKES A CLEAN SURFACE

1. Wipe down all surface(s) **EPCO** will be used with a mild cleaner or soap and cloth.
2. Wipe down same surface(s) with a clean dry cloth.
3. Once surface(s) are **DRY**, wipe all surface(s) with an alcohol wipe to remove any remaining grease or oil. Wipe down all buttons at the same time.
4. Allow buttons to **DRY. DO NOT TOUCH BUTTON SURFACE ONCE IT HAS BEEN TREATED WITH ALCOHOL.**
5. Remove an **EPCO** off the pad and with adhesive side down, center it over the surface. **DO NOT TOUCH ADHESIVE SIDE OF THE EPCO.**
6. Once centered, gently press down to adhere the **EPCO** to the surface. Gently rub over the entire **EPCO** area to adhere all edges to surface.
7. Repeat steps for all surfaces.

For maximum longevity, EPCO treated surfaces can be cleaned with a mild cleaner or soap after installation.
